

Most lawn problems come from poor soil condition, low or no fertiliser and water retention or drainage problems.

clay
breaker™
and soil conditioner

Winstone Gypsum™ ClayBreaker™ Improves soil quality and achieves healthy, vibrant lawns and gardens

It's a premium soil conditioner and mineral fertiliser for home gardeners and professional horticulturalists.

With approximately 80% of New Zealand soil being heavy, compacted or clay based, ClayBreaker™ can help address many commonly experienced problems in lawns and gardens, such as:

- Clay or hard compacted soils
- Surface crusting and cracking
- Poor water penetration
- Brown areas and dry spots
- Wet water-logged soil
- Moss
- Root rot and fungal diseases
- Weed control

clay breaker™

and soil conditioner

ClayBreaker™ has the unique ability to break up clay and loosen hard compacted soil enabling air, water and nutrients to penetrate plant roots. It:

- Enables plant roots to penetrate deeper, resulting in a strong healthy lawn
- Improves moisture retention during dry conditions, reducing surface crusting and cracking
- Increases the absorption and availability of water, air and nutrients to plants
- Aerates the soil improving soil drainage and reducing root rot, moss and fungal diseases
- Provides 23.3% Calcium which:
 - strengthens cell walls making lawns more resistant to insects and disease and
 - helps control weeds by boosting the lawns ability to absorb nitrogen and synthesise proteins robbing weeds of food – 90% of common lawn weeds are linked to a lack of calcium in the soil
- Provides 18.3% Sulphur, necessary for the development of a green protein rich leaf
- Enhances the absorption and effectiveness of other fertilisers

And it's a natural, non-toxic, organic mineral that is safe to use near children and pets. ClayBreaker™ is also pH neutral, which means it won't burn plants or affect soil acidity if over applied.

LAWN APPLICATION RATES:

Winstone Gypsum™ ClayBreaker™ is beneficial for all lawn varieties and can be applied any time of the year. For best results apply twice a year in Spring and Autumn.

Application	Application Rate	Coverage per 8kg bag	Coverage per 25kg bag
Lawns	Apply ½ - 1kg (2-4 cups) per m ²	8-16m ²	25-50m ²
